Dear delegates,

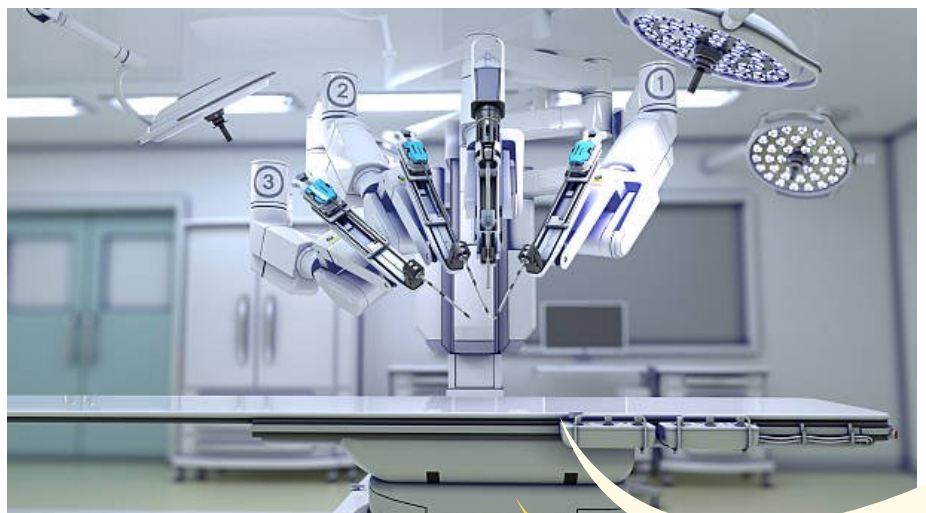

It is a pleasure to invite you all to a workshop on Medical Technology Innovation. This workshop is designed to provide an opportunity to participants to:

1. Explore and navigate the principles underlying the successes and challenges in developing medical devices for diagnostics and treatment.

2. Energize the potential innovators towards the challenging path of cost effective development of medical devices.

During this one-day intensive workshop, participants will engage in prototype development and interactive panel sessions that address the developmental process of medical device/instrument through a sustainable and efficient business model. With a focus on closing the gaps among all stakeholders involved in medical device development, this workshop is designed for participants with diverse experience and expertise. The trio of medical professionals-engineers-marketing experts will encourage networking with experts and professionals with experience in diverse fields.

*Prof. A K Tripathi (Patron)
Director*
